1 Introduction

Pizza Hut is offering 3 medium-sized pizzas and mixing & match the combinations at 1599 only which will save TK.484! But what would you do with 3 pizzas at the same time? Or often we want to buy some specific shade(s) from a lipstick set and the rest shades of the set are those we will never use. We will make Pair Up, a website-based system, and try to help them here. They can chat with each other. There will be some categories e.g. makeup, skincare, hair, clothing, toys, shoes, food, etc. They can search by product name or category to see whether someone match their need or not.

2 Proposed Features

- User login & registration
- Admin login & registration
- Chat
- Search by specific product name or category
